

Ancillaries & Customisation

PML can fit a comprehensive selection of quality ancillary products to their motor range carefully sourced from established manufacturers, or produced by PML.

CUSTOMISATION

PML has extensive application knowledge and experience in adapting standard PML motors to suit customer's precise requirements. This includes incorporating ancillary products into PML motors, or providing special features, such as alternative face mounting plates, or motor housings as requirements demand. PML is always pleased to resolve customers specific motor applications subject to agreement on specification.

Motor performance can also be precisely matched to application requirements. Most national and international standards are readily met, including CE, UL and CSA approvals which also encompass EMC conformity.

PML customised motors are used throughout industry including;

- Office equipment
- Defence
- Aerospace
- General Industrial applications

ANCILLARY PRODUCTS INCLUDE

Tachometers

Usually satisfied by the PML G-Tacho 9 and 12 models - full details are on the G-Tacho product sheet. If required, other suitable types can be fitted.

Encoders

Incremental and absolute types are externally fitted, with or without covers to suit customer requirements.

Resolvers

Fitted externally to PML motors, with or without covers.

Brakes

Readily fitted to most standard PML motors.

Gearboxes

A wide selection of quality precision gearboxes from proven manufacturers can be fitted to PML motors as required. This includes hollow through-shaft motor/gearbox arrangements.
